Product description

Short extension cable for EURO 20cm, 2 leads, with EURO connector male/female, max. 2.5A, 2x 0,75mm², CEE 7/16

Practical Power Cable Extension

- Euro Plug/Euro Socket 0.20m
- Ideal for Tight Power Strips

Discover the practical solution for spatially limited power strips with our Power Cable (Extension) Euro Plug/Euro Socket, 0.20m - MAG Art. No: CB-8V-02M (YP-21A/YC-22). With its compact size of 20 cm, this product is the perfect companion for your electronic devices, especially when space is tight.

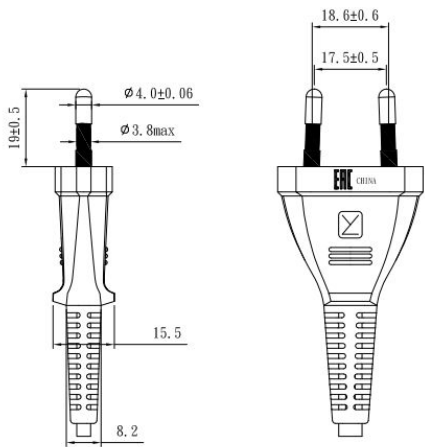

Performance Features

- Plug: Euro plug to Euro socket, ideal for easy extension of your device's power connection.
- Color: In plain black, it matches any device and decor.
- Length: With a length of 0.20m, it is sufficient to provide flexibility without causing unnecessary cable clutter.
- Cross-section: 2 x 0.75mm², designed for safe and efficient power transmission.
- Material: Made from H03VVH2-F material, known for its durability and reliability.
- Packaging: The product is delivered in bulk packaging, ideal for large orders and retail applications.
- ADVICE: VDE 0620-1 cable extensions without earth conductor are not allowed in following countries: CZ, DE, DK, IT, SK, UK

Applications

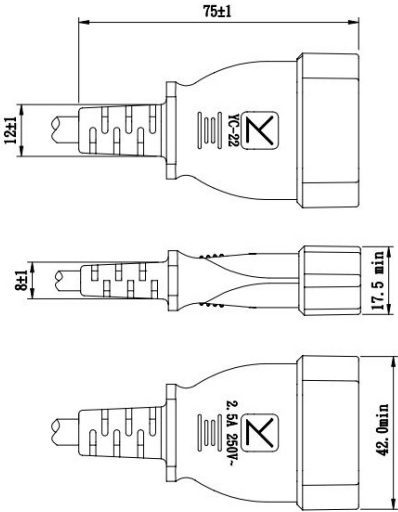

This short extension cable is great for a variety of applications. You can use it to extend the reach of your existing power supplies, especially in power strips where power supplies cannot fit side by side due to their size. It can also be used in homes, offices, workshops, or any other environment where an extension of the power supply is needed. It's compact enough to be easily transported and stored, making it an ideal accessory for travel.
